MODEL D GRIPPER

20,000 LB GRIPPER

The **20,000 # Gripper** is a cam operated assembly designed specifically for the welding industry. The gripper incorporates many features that make it especially suitable for the welding environment. These features include single point cam operation of the jaws and adjustable quick-change reversible jaws that can be positioned for small and large diameter work pieces. Heavy duty construction and a completely enclosed face plate prevents flux and weld splatter from impairing the operation of the gripper. The gripper will be designed for a 20,000# workpiece forward tilted 90 degrees with center of gravity 12" from the workpiece end. All Pandjiris equipment will be painted Sand machinery enamel, one coat.

Holding Capacity (outside clamping) Diameter 1-1/4" min - 52" max
Holding Capacity (inside clamping) Diameter..... 9" min - 54" max
Gripper Jaws (3) Serrated and Hardened Self -Centering
